Hi Cedric,

You should have received an invitation to be part of Augment-X on GitHub. After accepting that invitation, you should use this folder to store your code.

Please do your best (especially near the end of your MP) to clean up your code and add the necessary explanations, tutorials etc...

realise that we should be able to give your work to a new colleague, and they should be able to use and adapt your code it after one or two days.

https://github.com/Augment-X/Cobot_VR-Mocap.git

Good luck .

B.r. Tom T
